01 Big Data & Analysis

Olidata's Pillar of Innovation.

Over the years, we have built a solid reputation working with Public Administrations and large Enterprise entities.

Today, we are a benchmark in the market thanks to a team of certified experts capable of designing and developing cutting-edge architectural solutions.

Our mission? To transform data into tangible value for our clients, bringing innovation and sustainable growth.

02 Cybersecurity

Olidata's Digital Defense

The Olidata Competence Center provides advanced cybersecurity solutions, supporting customers at all stages: from advisory to technology implementation.

We offer SOC services, including monitoring, anomaly detection and incident management (IRT), with tools such as Splunk, QRadar and SGBOX.

We stand by our clients in crisis management, ensuring **timely and decisive actions** with a "SOC as-a-service" approach.

03 # Artificial Intelligence

>>>

Partners for Innovation and Digital Transformation

In the world where data is at the heart of technology, Olidata stands out with a dedicated competence center.

Our team of data scientists and academics develop and implement cutting-edge artificial intelligence algorithms, accelerating business innovation.

OLIDATA
THE POWER OF PIONEERS

ECM & BPM

Tailor-made Solutions for Business

With I.CON, an Olidata Group company, we offer consulting and development services for Public and Private in Enterprise Content Management and Business Process Management.

Our customized solutions **optimize** and **automate** business processes, improving the effectiveness and efficiency of our clients' business.

OLIDATA
THE POWER OF PIONEERS

ICT Infrastracture

Innovation in ICT Infrastructure

Olidata leads the digital transformation of ICT infrastructures, offering cutting-edge solutions in networking, storage and virtualization. With highly specialized and certified teams, we are the ideal partner to tackle complex challenges with cutting-edge technologies.

OLIDATA
THE POWER OF PIONEERS

06 Software Development >>>

IThe Engine of Digital Transformation

Software development is the key to digital transformation, enabling companies to adopt innovative technologies.

The Olidata Group is a leader in addressing the challenges of Digital Transformation, Artificial Intelligence, Big Data, ECM and BPM, ensuring tailored solutions for every need.

07 **GIS & IOT**

Innovation and Precision with Olidata

Olidata platforms effectively manage data from the IoT, with advanced solutions for IIoT (Industrial Internet of Things) and IOMT (Internet of Military Things).

Through our applications, we support strategic decisions in Public Safety and Civil Defense, offering geo-referencing of data for unprecedented accuracy. Olidata: where technology meets innovation.
